

Pushbutton Step attenuators can be used to adjust the power signal level by step within certain frequency range, they can also be used to adjust the test system's power level as inset attenuators, it is small with high accuracy and high stability etc.

SATP serial B type pushbutton step attenuators' average power 2W-25W frequency range from DC-4GHz, attenuation value 0-90dB by 0.1dB / 1dB/ 10dB step.
